

TACKLE COMMON PROBLEMS WITH THE RIGHT BOARD FOR THE JOB

BEAT THE COLD IN LOFTS, GARAGES, CELLARS & STONE HOUSES

- > Heat leaks from these areas
- > GTEC Thermal PIR is 50x more thermal resistant than standard board

TAKE THE WEIGHT OF TVs, SPEAKERS & HEAVY PICTURES

- > GTEC LaDura Board can hold up to 80kg
- > A 42" TV weighs 32kg, so you can hang the speakers, too

REPEL WATER IN SHOWERS, BATH & WET ROOMS

- > Standard plasterboard soaks up water
- > GTEC Aqua Board has a water absorption rate of just 3%, which means tiles stay on the wall and mould stays away

RESIST FIRE FOR CEILINGS BETWEEN FLATS & INBUILT GARAGES

- > GTEC Fire Boards provide 2x more time than standard board before the wall is breached

CUT-OUT NOISE FROM LOUD NEIGHBOURS

- > GTEC dB Board cuts down vibrations and is 35% quieter than standard board

REPEL MOISTURE IN KITCHENS AND UTILITY AREAS

- > Appliances like dishwashers and kettles create humidity, which weakens standard plasterboard
- > GTEC Moisture Board has less than 10% water absorption – true drywalling
